

THE widespread public demand for a floor finish having positive waterproof, weathproof and wearproof qualities, is answered by Kotafloor, the new, high lustre, quick drying floor finish that is super-efficient in every respect.

Kotafloor can be applied to wood, concrete or cement floors, new or old—inside or outside.

Kotafloor forms a wear-resisting surface of tile-like hardness that is proof against water, weather, oils, grease, alkali, lime, or dirt and gritty substances. It will not absorb soiling and it can be washed clean without the use of scouring soaps or powders. Plain soap and water is all that is necessary.

KOTAFLOOR

PORCH and FLOOR PAINT

Quick Drying

ALSO WHITE AND BLACK

KOTAFLOOR is particularly designed to provide unusually long wear and consequently it finds ready acceptance in homes, as well as business and other institutions where the maintenance of large areas of floor space is an important item of expense.

Kotafloor is invaluable in the home. In the kitchen, bathroom, on porch floors, in the basement, in the garage and around rugs, you will find Kotafloor unusual in appearance and wearability.

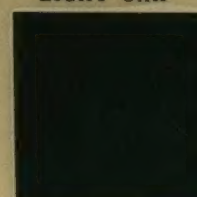

Kotafloor is also an ideal floor finish for large factories, offices, hotels, hospitals, schools, theatres, laundries, dairies, street cars, and wherever large areas of floor space are subject to an unusual amount of hard service.
